FOREWORD

A bibliography is an essential tool for the researcher. The first bibliography on Islamic Economics was published by this Centre before 15 years. Since then there has been a great increase in publications relating to various aspects of Islamic Economics. The Centre has therefore started preparing a series of specialised bibliographies rather than one covering the whole field.

Mr. Muhammad Akram Khan's present work, like the one he prepared for us before on *Economic System of Islam*, will be of great help to scholars. It lists about 300 books and articles in English on different aspects of Public Finance in Islam.

We appreciate his cooperation and request those using these bibliographies to help us improve them by making suggestions, providing relevant data, etc..
